C2500 USER'S MANUAL

ENGLISH

Please read this manual carefully before operating your mobile phone. Retain it for future reference.

Welcome

Thank you for purchasing a LG Handset Mobile Phone. We built our Handset to give user what we believe user really want from a wireless phone, clear sound, and fashion outlook.

Our advanced technology is designed to grow with users communications needs so that one day you will be able to rely entirely on users Handset to stay connected.

This guide will familiarize user with our technology and new Handset phone through simple, easy to follow instructions. If users have already reviewed the Quick Start Guide, which was packaged with new Handset, then user are ready to explore the advanced features outlined in this guide.

If users have not read "Quick Start Guide", go to Section One Getting Started. This section provides all the information user need to quickly activate phone and much more.

We congratulate on your choice.

Safety Information

Please read and understand the details which are both safe to you and your environment. Failure to observe these instructions may lead to suspension of cellular phone services to the user or some legal action.

Important information for parents:

Please read the operating instructions and safety precautions carefully before use. Explain the content and the hazards associated with using the phone to your children.

Emergency Calls (SOS)

Emergency call can be made from your cellular phone even without a SIM in the network service area.

Traffic Safety

Please do not use your cellular phone while driving; finding a safe place to stop first.

Switch off in Hospital

The use of cellular phones may interfere with the functionality of some possible insufficiently protected medical devices in hospital.

Switch off in Airplane

The use of cellular phone in an aircraft may be dangerous to the operation of the aircraft; disrupting the cellular network and may be illegal.

Switch off in Gasoline Station and Explosive Site

It is advisable that users turn off cellular phone when refueling is in progress, users are reminded to observe restrictions on the use of radio equipment in fuel depots.

Safety Information

Operating Environment

Mobile radio transmitting equipment, including cellular phones, may be subject to interference and may cause danger. Switch off your phone whenever it is forbidden to use it.

Replace

You may only open the phone to replace the battery and SIM card. You must not open the battery under any circumstances. All other changes to this device are strictly prohibited and will invalidate the operating license.

Use Sensibly

Do not hold the phone to your ear when it ring or when you have switched on the hand free function. Otherwise you risk serious permanent damage to your hearing.

Interference Noticed

The phone may cause interference in the vicinity of TV sets radios and PCs.

Appropriate Maintenance

Only qualified and authorized personnel should service your cellular phone. Faulty installation or repair may be hazardous.

Accessories

Use only accessories and charging devices approved by the phone manufacturer. Otherwise you risk serious damage to health and property. The battery could explode, for instance.

Power Voltage

The mains voltage specified on the power supply unit (Volt) must not be exceeded. Otherwise the charging device may be destroyed.

Waste Disposal

Dispose of worn out batteries and phone in accordance with local provisions.

Rechargeable Battery

- **If battery is over discharged the handset will need to pre-charge less than 7 minutes.**
- Avoid accidental shorts across the contacts of battery by metal parts.
- Prevent extreme low and high ambient temperatures for the battery. Therefore do not place battery near a heater or on the car dashboard.
- Do not open, penetrate or otherwise physically damage the battery.
- Do not incinerate battery.
- These first two pages include some basic tips for quick and easy use of the phone. For more detailed information read through the user guide.
- **Before using your phone:** With the battery removed, insert the SIM card, then insert the battery and charge it. Switch on your phone by pressing and holding . For details, see page 18.
- **Turning Your Phone On and Off**
To switch the phone on or off press and hold .

Guidelines for safe and efficient use

Exposure to radio frequency energy

Radio wave exposure and Specific Absorption Rate (SAR) information

This mobile phone model C2500 has been designed to comply with applicable safety requirement for exposure to radio waves. This requirement is based on scientific guidelines that include safety margins designed to assure this safety of all persons, regardless of age and health.

- The radio wave exposure guidelines employ a unit of measurement known as the Specific Absorption Rate, or SAR. Tests for SAR are conducted using standardized method with the phone transmitting at its highest certified power level in all used frequency bands.
- While there may be differences between the SAR levels of various LG phone models, they are all designed to meet the relevant guidelines for exposure to radio waves.
- The SAR limit recommended by the international Commission on Non-Ionizing Radiation Protection (ICNIRP), which is 2W/kg averaged over ten (10) gram of tissue.
- The highest SAR value for this model phone tested by DASy4 for use at the ear is 0.551 W/kg (10g).
- SAR data information for residents in countries/regions that have adopted the SAR limit recommended by the Institute of Electrical and Electronics Engineers (IEEE), which is 1.6 W/kg averaged over one (1) gram of tissue.

Product care and maintenance

Warning: Use only batteries, charger and accessories approved for use with this particular phone model. The use of any other types may invalidate any approval or warranty applying to the phone and may be dangerous.

- Do not disassemble this unit. Take it to a qualified service technician when repair work is required.
- Keep away from electrical appliance such as a TV, radio or personal computer.
- The unit should be kept away from heat sources such as radiators or cookers.
- Do not drop.
- Do not subject this unit to mechanical vibration or shock.
- The coating of the phone may be damaged if covered with wrap or vinyl wrapper.
- Do not use harsh chemicals (such as alcohol, benzene, thinners, etc.) or detergents to clean your phone. There is a risk of this causing a fire.
- Do not subject this unit to excessive smoke or dust.
- Do not keep the phone next to credit cards or transport tickets, it can affect the information on the magnetic strips.

- Do not tap the screen with a sharp object otherwise, it may damage the phone.
- Do not expose the phone to liquid or moisture.
- Use the accessories like an earphone cautiously.
- If you put your phone in a pocket or bag without covering the receptacle of the phone (power plug pin), metallic articles (such as a coin, paperclip or pen) may short-circuit the phone. Always cover the receptacle when not in use.
- Never place your phone in a microwave oven as it will cause the battery to explode.
- Only authorized personnel should service the phone and its accessories. Faulty installation or service may result in accidents and consequently invalidate the warranty.
- Do not use the phone if the antenna is damaged. If a damaged antenna contacts skin, it may cause a slight burn. Please contact an LG Authorized Service Center to replace the damaged antenna.
- The label of the phone contains important information for customer support purposes. Do not remove it.

Efficient phone operation

To enjoy optimum performance with minimum power consumption please:

- Hold the phone as you speak to any other telephone. While speaking directly into the microphone, angle the antenna in a direction up and over your shoulder. If the antenna is extendable/ retractable, it should be extended during a call.
- Do not hold the antenna when the phone is in use. If you hold it, it can affect call quality, it also may cause the phone to operate as a higher power level that needed and shorten talk and standby times.
- If your mobile phone supports infrared, never direct the infrared ray at anyone's eye.

Electronics devices

All mobile phones may get interference, which could affect performance.

- Do not use your mobile phone near medical equipment without requesting permission. Avoid placing the phone over the pacemaker, i.e. in your breast pocket.
- Some hearing aids might be disturbed by mobile phones.
- Minor interference may affect TVs, radios, PCs, etc.
- Do not bend, scratch or expose to static electricity.

Guidelines for safe and efficient use

Road safety

Check the laws and regulations on the use of mobile phones in the areas when you drive.

- Do not use a hand-held phone while driving.
- Give full attention to driving.
- Use a hands-free kit, if available.
- Pull off the road and park before making or answering a call if driving conditions so require.
- RF energy may affect some electronic systems in your motor vehicle such as car stereo, safety equipment.
- When driving car, do not leave your phone or set up the hands-free kit near to the air bag. If wireless equipment is improperly installed and the air bag is activated, you may be seriously injured.

Blasting area

Do not use the phone where blasting is in progress.
Observe restrictions and follow any regulations or rules.

Potentially explosive atmospheres

- Do not use the phone at a refueling point. Don't use near fuel or chemicals.
- Do not transport or store flammable gas, liquid or explosives in the compartment of your vehicle, which contains your mobile phone and accessories.

In aircraft

Wireless devices can cause interference in aircraft.

- Turn off your mobile phone before boarding any aircraft.
- Do not use it on the ground without crew permission.

Battery information and care

- You do not need to completely discharge the battery before recharging. Unlike other battery systems, there is no memory effect that could compromise the battery's performance.
- Use only LG batteries and chargers. LG chargers are designed to maximize the battery life.
- Do not disassemble or short-circuit the battery pack.

- Keep the metal contacts of the battery pack clean.
- Replace the battery when it no longer provides acceptable performance. The battery pack may be recharged hundreds of times until it needs replacing.
- Recharge the battery if it has not been used for a long time to maximize usability.
- Do not expose the battery charger to direct sunlight or in high humidity, such as the bathroom.
- Do not leave the battery in hot or cold places, this may deteriorate the battery performance.

Network service

- Some services and functions described in this user's guide are dependent on network or subscription. Therefore, all menus may not be available in your phone. Please consult network operator for more information about your subscription.

Guidelines Children

Make sure to remove and dispose off the display protection foil as well as all other foils. Keep all foils out of the reach of children, as foils can be inhaled or swallowed.

Quick Start Guide

PIN Code

- The PIN (Personal Identification Number) protects your phone and SIM card against unauthorized use.
- With your SIM card inserted, your PIN code will be required every time you switch on your phone.
- If a wrong PIN code is entered three consecutive times, the phone becomes locked or disabled. You need to ask network service provider to use the PUK code to unlock or enable the phone again.

Making and Answering Call

Making call

- Ensure that the phone is on, the network operator name is displayed and the signal strength meter shows network coverage is available in the current area.
- Enter phone number include area code you want to dial. If you key in wrong character, press Clear to delete it.
- Press  to call the number.
- Press  to end the call or to cancel the call attempt.

Answering call

- To receive a call, the phone must be switched on and the signal strength meter must be displayed.
- Press  to answer a call.

Reject call

Press  to reject the call when the phone is ringing.

Ending Call

Press  to end a call.

Call Emergency Number

You can place emergency calls (dial 112 and press ) even if your phone is locked or your account is restricted.

Missed call Notification

When an incoming call is not answered, the Missed call log is displayed on your screen.

To display the Missed call entry:

- Select the entry and press  to read call detail.

Lock/Unlock Keypad

In the Idle mode:

- Long press  to lock keypad.
- Press  then  to unlock keypad.

Camera

The phone provides a built-in camera. The camera can use for taking pictures. User can use these pictures as wallpaper or Screen saver in Idle mode. For detail, see “Multimedia/Camera” on page 47.

Listening Music and FM Radio

User can enjoy favorite music and FM radio anywhere and anytime. For detail, see “Multimedia/MP3 player (FM radio)” on page 48 (50).

Multimedia Message Service

The Phone is able to send multimedia messages composed of text and a picture, and to receive messages containing text a picture, and sound. You can save the pictures and ringing tones for personalizing your phone. For detail, see “Messages / Multimedia message” on Page 39/42.

General Packet Radio Service (GPRS)

GPRS technology allows mobile phones to send and receive data over a mobile network and access data networks like the Internet.

GPRS uses a technology call packet data. Data files are sent in short bursts over the mobile system instead of in a continuous stream. This way, the system is busy only when sending or receiving data. Because GPRS uses the system more efficiently, data connections are set up quickly and data is transferred at faster speeds.

Understanding Your Phone

Front / Back view of Phone

Key Function List

A. Power/End key

Switch phone on and off. Also, ends a call or Exit from any function and back to Idle mode.

B. Selection Key

The function of the keys depends on the text shown on the display above the keys. For example, Menu and Contacts in Idle mode.

C. Navigation Key

Use for quick access to phone functions in Idle mode.

- Up key: Access to the **Favorites** menu.
- Down key: Access to the **Contacts list** menu
- Left key: Access to the **Profiles** menu
- Right key: Access to the **Messages** menu

Scroll through names and numbers stored in the contacts or through the phone's menus, submenus and option list.

D. Send/Answer Key

- Make and answer calls or press in Idle mode to see recent Call logs.
- 0-9 input number and character.

E. Left Side Key

Adjust handset volume

F. MP3 Play / Camera Key

Press the shortcut key on left side of the phone to enter MP3 player in Idle mode. For details, see also "MP3" on Page 48.

Long press the shortcut key to enter Camera in Idle mode. For details, see also "Camera" on Page 48.

Understanding Your Phone

Essential indicators

	Indicates signal strength and alternate line service.
	Shows handset current battery charge strength.
	Indicates the phone keypad is locked.
	Indicates the profiles alert type is Ring
	Indicates the profiles alert type is vibration.
	Indicates the profiles alert type is vibration and ring.
	Indicates the profiles alert type is vibration then ring.
	Indicates the profiles alert type is light only.
	The Alarm clock is set on.
R m	Indicates “roaming”.

	Indicates earphone plug in
	Indicates missed call.
  	Indicates Broadcast set on.
	Indicates new text messages.
	Indicates new multimedia messages
	Indicates new service message
  	Indicates call diverted is set on.
	Indicates GPRS is connected
 	Indicated loud speaker turn on/off

Getting Started

SIM Card and Battery Information

Insert SIM card

- The SIM is inserted into the back of the phone underneath the battery.
- Press the knob and slide the battery cover off. Remove the battery.

- Place the card inside the SIM card holder such that the golden connectors are facing downwards. Push SIM card in to the socket.

Remove SIM card

- With the battery removed, press SIM card in the direction of arrow ①, then slide the SIM card in the direction of arrow ② to remove the SIM card sliding it lightly.

Insert battery

- Slide the battery into the cradle and press the battery down flat.
- Place the back cover and slide it into place.

Charge battery

- Connect the USB cable to the power jack on the bottom of your phone.
- Connect the charger to an AC wall socket. The charging icon is displayed briefly if the phone is switched on. If the battery is completely empty, it may take a few minutes before the charging indicator appears on the display or any calls can be made.

! Warning:

If the battery is totally empty, charging icon or LED is not on.
Therefore, you should charge the battery maximum up to 7 minutes.

Personalizing your Phone

Setting clock

Within the Settings menu you can set the phone to display the clock in the Idle mode and choose whether to use 12-hour or 24-hour format.

Setting display language

In the **Settings** menu you can select the language in which the display texts are shown.

Setting standby note

Within **Standby note** menu you can write a text, which is displayed in the Idle screen.

Activating a profile

To access the list of profiles through the menu, press **Menu**, then use Navigation key scroll to **Profiles** and press **OK**. Press **Option** key to activate the certain profile and press **OK**.

Personalise profile

- In the Idle mode press **Menu**, then use Navigation Key to access **Profiles**.
- Choose Profiles from list of profiles, **General**, **Vibrate only**, **Silent**, **Outdoor**, and **Headset**. Press **Option** to personalise it.
- After choosing profiles, select **Personalise** press **OK**. Select the setting you want to personalise, you can personalise the following settings of the selected profile:
- Tone setup: to set the ringing tone type for incoming call or others.
- Volume: to set the volume level for the ringing and keypad tones.

Getting Started

- **Alert type:** to define how the phone notifies you when receiving an incoming call. The options are: **Ring**, **Vibrate**, **Ring & Vib.**, **Ring after Vib.**, **Silent** and **Beep once**.
 - When alert type is set to Vibrate or Silent, no ringing tone will be heard and  is displayed when the phone is in the Idle mode.
 - **Answer mode:** To set the phone answer an incoming voice call by press Send key or Any key or Auto (headset mode only).
 - **Extra tone:** to set the **Warning**, **Error**, **Camp on**, **Connect On** or **Off**. For example, when set to on, the phone sounds a warning tone when the battery is running out of power.
 - **Light:** user can define the timer of the LCD backlight, turn on/off the keypad backlight or select the color pattern of the Status LED.
- ### Tips for Call Options
- A call can be connected to any single caller by pressing Option key. When user press Option key during active call, user can choose one of those functions from the list:
 - Hold: hold a call on.
 - Retrieve: reconnect a holding call.
 - Retrieve all: reconnect all holding call.
 - Swap: switch between the call on hold and active.
 - Conference: make a multi-party conversation.
 - Transfer: transfer a call.
 - Spilt: to suspend the multi-party call.
 - End single: end one of conference call.
 - End all: end a multi-party call.
 - End: End a call.
 - Mute/Unmute: mute the call during the conversation.
 - New call: make a new call during an active call.
 - Contacts: shortcut to contacts menu.
 - Text message: shortcut to Message menu.
 - Voice recorder: start recorder conversation.
 - DTMF: set On / Off for DTMF (Dual Tone Multi-Frequency) tone dialing system.
 - **Adjust volume during a call**

During an activate call, press left side key to adjust volume. If the Loudspeaker is activated, use left side key adjust volume also.

- **Loudspeaker**

Loudspeaker mode let handset act as loudspeaker during a call. Do not hold the handset to your ear if loudspeaker mode on. To activate  /deactivate  the loudspeaker during a call, press , the single will show on the screen. The loudspeaker is automatically deactivated when you end the call or call attempt or connect the headset to the phone. The loudspeaker is default setting for playing MP3, voice recorder.

- **Note**

Using FM radio, user should plug in headphone; FM radio does not support loudspeaker function.

- **Hold a call**

Pressing  and selecting Hold allows you to put an active call on hold. This feature can be used when an incoming call is received during an active call or if you want to make another without disconnecting the active call.

- **Make a new call during a call**

You can dial a number during a call without disconnecting the active call.

- Press  and select **Hold** to put an active call on hold then press **Option** select New call. Make a new call by keying new number.
- Press Option and select Swap, new number will go on hold, old number will be active and vice versa.
- You can also select record from contacts, after select New call, press Back to option list and choose Contacts.

- **Multiparty call**

- You can connect to several people together or individually at a time.
- Make a call to the first participant.
- Call the second participant as explained in **Make a new call during a call**.
- Press  and select Conference. This joins the calls to the conference.
- Repeat step 2 and 3 to allow new participants to be connected to the Conference.
- Press **Option** and select **End all** to end the call. Or press .
- Any call (participant) can be disconnected by press **Option** key and select **End single**.

Getting Started

- **Call waiting**

- Press Options key. The first call is put on hold.
- To switch between two calls, press **Option** and choose **Swap**.
- To end the active call press . (Or to end both calls at the same time. Press **Option**, move to End all calls. and press **OK**.)

Using the Menu

Navigating Functions

By scrolling

- To access the menu press **Menu**.
- Scroll with , , ,  through the menu and select for example, **Organizer** by pressing **OK**.
- If the menu contains submenus, select the one that you want. For example, **Contacts**.
- If the selected submenu contains further submenus, repeat above step. Select the next submenu, for example, **View**.
- Select the setting of your choice.
- Press **Back** to return to the previous menu level and **Back** the menu.

By numbering

After entering **Menu**, you can access menu and submenu items by using their matching number. For example: Press  then , you can access **Games**.

Writing Text

Typing method

- You can enter text for example, in contacts or writing messages, by using the **Multitap** or **T9** text input mode.
- T9 text input mode is based on a built-in dictionary. When you writing text, you can key in any letter with a single key press. The word changes after each keystroke.
- When you are writing text, press  either to change input mode.
- The typing method is indicated by one of the following item: **T9Abc**, **T9abc**, **T9ABC**, **123**, **Abc**, **abc**, **ABC**, (For detail information about text input mode, see table below.)

■ Text input mode

T9Abc	T9 Abc (T9 English input mode)
T9abc	T9 abc (T9 English input mode)
T9ABC	T9 ABC (T9 English input mode)
123	Numeric
Abc	Multitap Abc (Traditional input mode)
abc	Multitap abc (Traditional input mode)
ABC	Multitap ABC (Traditional input mode)

Using the Menu

- You can change the character case by pressing  and you can change between the letter and number mode by pressing .

Using traditional text input

- Press a number  key  to, repeatedly until the desired character appears. The characters available depend on the language selected in the **Settings** menu, **Language**.
- To input next letter you want, is located on, the same key as the present one, wait until the cursor appears.
- The most common punctuation marks are available under the number key .

Using T9 text input

T9 input mode is only available for the modes and languages on the method list. You can key in any letter with a single keypress. The T9 text input is based on a built-in dictionary.

- You can select T9 languages by selecting menu by press **Option** into list, or in the editor screen long press  enter T9 languages option. In T9 menu, you can also select T9 off function.

Note

The handset default setting for T9 languages is T9 on.

- Start writing a word by using the keys  to . Press each key only once for one letter. The word changes after each keystroke.
- Example: To write HAPPY when the predictive test mode is selected, press  once for H,  once for A,  once for P,  once for other P, and  once for Y.
- When you have finished writing the word and it is correct, confirm it by pressing Navigation, right key. Pressing  by adding a space to move the cursor.
- Start writing the next word.

Tips for writing text

- To move the cursor to the left, right, down or up, press the Navigation key.
- To delete a character to the left of the cursor, press **Clear**. Press and hold **Clear** to delete all characters more quickly.
- To insert a special character, press  to get the table with special characters, and then press **OK** back to message.

MP3 player [Menu 6-2]

Your phone includes an MP3 player for listening to MP3 files.

MP3 files stored in the MP3 folder (Default setting) will automatically be detected and added to the default play list.

You can listen to the sound files via a compatible headset, or the phone's loudspeaker. You can make or answer a call while using the MP3 player. During a call, the playback is paused.

! Note

Because of the small dimension of the speaker, in some cases the audio could be distorted, especially at maximum volume and when there are lots of bass sounds. Therefore, we recommend you to use the stereo headset in order to appreciate the high quality of your music.

The MP3 player supports: [Menu 6-2-1]

- **MPEG-1 Layer III:** Sampling frequency up to 48 KHz. Bit rate up to 320 Kbps stereo.
- **MPEG-2 Layer III:** Sampling frequency up to 48 KHz. Bit rate up to 320 Kbps stereo.

 - For selected folder, press Option, one of the options is available: audio, images, MP3, and photos.
- Create folder: to add a new folder into list
- Format: you can format the file list.

Browser [Menu 8]

Your phone supports both SIM service and WAP (Wireless Application Protocol) services. These services allow you to browse all kinds of information such as news, weather reports, flight schedules, dictionaries, etc. Even more, you can connect to the Internet and go to your favorite WAP enabled web sites. The following sections explain how to setup and use these wonderful services.

SIM service [Menu 8-1]

In addition to the functions available in the phone, your SIM card* may provide additional services under the SIM service submenu**. By entering the submenu, you can find a list of services provided by your operator. The requested information may be responded via voice speech or Text message (Short Message Service). Additional charges may apply for services involve sending a text message or making a phone call.

WAP [Menu 8-2]

The WAP service enables your phone to surf the Internet. Your phone offers you several default profiles to choose from.

These default profiles are based on the connection settings of major operators at the time this phone was manufactured. You can apply the desired connection settings by simply activating the respective profile and you are ready to go.

Home [Menu 8-2-1]

For each profile you are allowed to store a Home URL (Universal Resource Locator) address. You can quickly access the homepage of the active profile by selecting Home when the WAP menu is displayed.

Bookmarks [Menu 8-2-2]

You can save the addresses of web pages as bookmarks in the phone's memory.

- Press **Menu**, and select **Browser WAP** and **Bookmarks**.
- Choose the bookmarks you want to use and press **Options**.
- Select **Goto** will open a connection to the page associated with the bookmarks. You can also **Edit** or **Delete** the selected bookmarks, or **Add bookmark** by entering the title and URL address.

* Some SIM cards may not support SIM service. In such case, you won't be able to see the SIM service submenu.

** SIM service vary from operator to operator. The name and contents of the menu depend entirely on the SIM card provided by your operator. For availability, rates and information on using the SIM service, contact your network operator, service provider or other third-party vendor.

Recent pages [Menu 8-2-3]

You can view the recent pages that you have read. Press **Goto** to connect to the selected page.

Go to URL [Menu 8-2-4]

Key in the URL address and press **OK** to connect to the address.

Service inbox [Menu 8-2-5]

The received WAP push message will be stored in the Service Inbox. This means that a service provider sends WAP content to your phone without having you to do anything. You can get updated news or new WAP settings from your service provider.

In the push message list, press **Options** key to **Accept** or **Delete** push message.

Settings [Menu 8-2-6]

• Edit profile

The WAP settings are stored in a WAP profile. In most cases you only need to use one of the default profiles to access the Internet. The settings are different from operator to operator. Please consult your operator or service provider for the correct settings and proceed with care. Wrong settings will cause the connection to fail.

- Within **Edit profile** submenu, press **OK** key to enter profile editing list.

- Activate profile: press **OK** to activate the selected WAP profile.
- Rename profile: you can rename the selected WAP profile.
- Home: enter a title and address of the WAP web site as the homepage. You can only have a homepage for each profile.
 - Press **Menu**, select **Browser, WAP, Settings** and **Edit profile** then press **OK**.
 - Choose the desired profile from the setting list first and then press **OK**, and select Edit profile.
 - Choose **Home** and press **OK**.
 - Key in the Home title and URL address then press **OK**.
- Data account: users are only allowed to choose a data account. The list of the accounts should be consistent to those under Service menu - Data Account.
- Connection: select Connection-oriented, Connectionless or HTTP from the list.
- Username: enter your user ID for the WAP gateway.
- Password: enter your password for the WAP gateway.

• Browser options

- Timeout: set the timeout value for the browser. The browser will stop connecting to the web site if the web site does not respond within the timeout time.
- Show images: set option On or Off to view pictures while browsing.

Browser [Menu 8]

- **Service message settings**

Turn **On** or **Off** to decide whether you want to receive the service message or not. The message is saved in the Service Inbox.

- **Clear cache**

The information or data you have accessed are stored in the cache of the phone. A cache is a file buffer which is used to store data temporarily.

Within **Settings** submenu, select **Clear cache** and press **OK**.

- **Clear cookies**

It is advisable to clear any sensitive information like cookies of previously visited web sites. This is to avoid privacy and security risks if your phone is misplaced, lost or stolen.

Press **OK** to clear all the cookies

- **Clear recent page list**

It is advisable to clear any sensitive information about previously visited web pages in recent page list. This is to avoid privacy and security risks if your phone is misplaced, lost or stolen.

Press **OK** to delete all the recent pages.

- **Trusted certificates**

For using some services, such as banking services, you need security certificates. After you have downloaded the required security certificate from the Internet, you can view the certificate and then save or delete it. If you save it, the certificate is added to the list of trust certificates under the **Settings** of **WAP** menu.

- **View the list of Trust Certificates:**

Press **Menu**, select, **Browser**, **WAP**, **Settings** and **Trust certificates** press **View key**.

If the security indicator is displayed during a connection, the data transmission between the phone and the gateway server is encrypted. However, the security indicator does not indicate that the data transmission between the gateway and the content server (the location where the requested resource is stored) is secure. It is up to the service provider to secure the data transmission between the gateway and the content server.

Data account [Menu 8-3]

To display the data account information. Default data accounts based on major operators at the time this phone is manufactured are provided.

There are two kinds Data Account:

GSM data [Menu 8-3-1]

Press Edit to change the data account settings, including: Account name, Number, User name, Password, Line type, Speed and DNS.

GPRS [Menu 8-3-2]

Press Edit to change the data account settings, including: Account name, APN, User name, Password and Auth. type.

Troubleshooting guide

To save the time and expense of an unnecessary service call, perform the simple checks in this section before contacting a service professional.

Problem	Possible Corrective measures
Telephone cannot be switched on	Please take out battery and insert battery again then press  to power on the phone.
Battery empty	Charge battery. Check charging indicator in the display.
The battery doesn't charge properly or the phone sometimes turns itself off	Wipe the charging contacts both on the phone and on the battery with a clear soft cloth.
Usage time of battery becomes shorter	If the battery time is short, it may be due to the user environment, or large volume of calls, or weak signals.
Charging error—Temperature out of range	Make sure the ambient temperature is right, wait for a while, and then charge again.
Charging error—Charger defective	If the charger does not warm up, replace it.
Charging error—Wrong charger	Only use original LG accessories.
Charging error—Battery defective	Replace battery.
Forget the, phone code or password	The default phone code is "0000".
Enter PUK	The PIN code has been entered incorrectly three times in succession, and the phone is now blocked. Enter the PUK supplied by your service provider.
Phone loses network	The network connection has been lost. You may be in a weak signal area. Move and try again. You are trying to access an option for which you have no subscription with your service provider. Contact the service provider for further detail.

Troubleshooting guide

Problem	Possible Corrective measures
You have entered a number but it was not dialed	Be sure that you have pressed  . Be sure that you have accessed the right network service. Be sure that you have not set an outgoing call barring option.
Your correspondent cannot reach you	Be sure that your phone is switched on. Press  for more than one second. Be sure that you are accessing the network service. Be sure that you have not set an incoming call barring option.
Your correspondent cannot hear you speaking	Be sure that you have switched off the loudspeaker. Be sure that you are holding the phone close enough to your mouth. The microphone is located at the bottom of the phone.
The audio quality of the call is poor	Check the signal strength indicator on the display  . The number of bars indicates the signal strength from strong  to weak  . Try moving the phone slightly or moving closer to a window if you are in a building.
No number is dialled when you recall a Contacts entry	Use the Contacts/Search feature to ensure the number has been stored correctly. Resave the number, if necessary.
If the above guidelines do not help you to solve the problem	Take note of the model number of your mobile phone and a clear description of the problem. Contact your phone dealer or LG Service Center for help.
